About Me

I'm Oliver Barclay, a 4th Year Software Engineering student at the University of Canterbury with solid experience in Java, C#, Python, JS (React), SQL, Docker, and Homelabbing. I enjoy turning complex real world challenges into practical solutions and collaborating with keen developers and business leaders who want to achieve high-quality products. NZ and US citizen.

Experience

Trimble SiteVision Developer (Ongoing)

Part-time Software Developer.

- Developed custom DevOps tools to improve development efficiency
- Engineered native plugins for iOS and Android to streamline the development pipeline
- Hands-on technical development in a mixed reality environment

Trimble Mixed Reality Testing Intern (Summer 2025-2026)

Performing manual E2E tests for Trimble SiteVision team.

- Performed rigorous software quality assurance testing
- Conducted full systems testing and delivered testing/bug reports
- Provided UI/UX feedback through multiple user perspectives to improve the final product

Solo Game Developer (Ongoing)

Self-managing the full development of a commercial 2D indie game using the Godot Engine.

- Learning GDScript, game engine systems, and game design principles
- Designing and implementing core

gameplay mechanics, including AI behaviour system

- Managing project scope and deadlines
- Learning new tools and problem-solving technical challenges in real time

Noel Leeming Seasonal Team Member (Summer Breaks 2023 & 2024)

- Worked on the till and the floor helping customers with their purchases and customer service issues
- Operated effectively and amicably in a very busy environment in a customer facing role

DRAMASOC Exec. Member/Certified First Aider/Service

- Executive member of the UC Drama Society directing the improv sub-committee
- Successfully completed the [Comprehensive Workplace First Aid Course](#)
- Organised and ran a clothes drive for underprivileged families
- Volunteered as a Theatresports coach, teaching improv and acting

Education

Fourth Year Software Engineering Student at the University of Canterbury (2023-Present)

- Achieved A+ on the Software Engineering project where we self managed to produce a high quality piece of software within a given timeframe and specifications
- Proficient in Java, Python, C/C++, SQL, TypeScript, and Cucumber & Gherkin Testing
- Applied Agile/Scrum methodologies in collaborative team environments to develop a year long software product

Saint Kentigern College (2016-2022)

- Academic Honours (2021) NCEA Excellence Endorsement (2020 - 2022)
- Appointed a Peer Support Leader (2022)
- Various cups and awards for Diligence and the Arts

Skills

- **Java**
 - Auto Testing (JUnit / Cucumber)
- **Python Programming & Algorithms**
 - Built parts of a Python Compiler
 - OO and Dynamic Programming
- **HTML, CSS, React, TypeScript**
 - Solo developed a full stack web application
- **C#**
 - Worked on the port of SiteVision from Unity to Godot
- **Rust**
 - Developed a dApp using Rust and React
- **Docker**
 - Running a multi-node homelab with docker containers under high availability (k3s cluster)
- **Agile/Scrum Methodologies and Project Management Skills**
 - Applied in a year-long team project
- **Business Analysis**
 - Understanding user needs, clarifying requirements, and translating them into clear, actionable user stories that align with business goals
- **Godot & Unity Engine**
 - Practical Experience developing a product from start to finish
- **SQL**
- **Git**
- **CAD Software**
- **3D Printing**
